- 

## PROJECTS

### WineKey | <http://fv-winekey.herokuapp.com> | <https://github.com/wolfdog27/Wine-Key>

- Commissioned by Fire&Vine Hospitality, Wine Key is a wine inventory/trading application.
- Back-End Developer: implemented bcrypt for basic security log-in page, Sequelize and Express to create functional CRUD wine inventory tables for each restaurant, and complete searchable master wine list.
- HTML5, CSS, JavaScript, Node, Express, Sequelize, Handlebars, jQuery, ZURB Foundation

### Pawsitivity | <https://pawsitivity-atack.herokuapp.com> | <https://github.com/wolfdog27/pawsitivity-front-end>

- Pawsitivity is a React pet adoption application connecting users and animal shelters. Users can swipe for local (filtered) cats or dogs, while shelters can update their list of adoptable pets and connect with users.
  - Front-End Developer: designed UI/UX with Ant Design, implemented Google Maps from PetFinder information via Geocode, created modals with animal information with props and state.
  - React.js, HTML5, CSS, JavaScript, Node, MySQL, axios, API
- 

## EDUCATION
